GALLERY INFORMATION GALERIEINFORMATION

Galerie Guy Bärtschi has throughout the years been able to evolve towards a unique and well defined exhibition program, confirming its particular focus on the art from the 80's until today. Today, its three exhibition spaces – the ground floor, the basement and the recently inaugurated project room – amounting to 500 square meters, allow the gallery to simultaneously present different projects often produced especially by the gallery, representing both established artists, as well as young artists oriented towards new technologies and providing them with a promotional platform. On the occasion of most individual shows, the gallery publishes a catalogue staging the artists' recent works.
